DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7, 9 and 10 are allowed.
2. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claim 1 is the inclusion of the limitations being for an ink jet recording device including measuring means for measuring an elapsed time from an end of the previous recording; supplying means for supplying an ink from the first ink tank to the second ink tank, wherein the supplying means supplies the ink from the first ink tank to the second ink tank if the elapsed time measured by the measuring means is less than a first threshold; otherwise supplies the ink from the first tank to the second ink tank after a residual ink is jetted from the second ink tank, if the elapsed time is not less than the first threshold value and less than a second threshold value; and otherwise supplies the ink from the first ink tank to the second ink tank, and jets the ink from the second ink tank to supply the ink again, if the elapsed time is not less than the second threshold value. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 9 is the inclusion of the method steps of an ink jet recording device that includes a measuring step of measuring an elapsed time from an end of previous recording; a comparing step of comparing the elapsed time measured in the measuring step with a first threshold value or a second threshold value; and a supplying step of supplying ink from the first ink tank to the second ink tank in accordance with a result of the comparison step, wherein in the supplying step, the ink is supplied from the first ink tank to the

second ink tank if the elapsed time is less than the first threshold value; otherwise the ink is supplied from the first ink tank to the second ink tank after a residual ink is jetted from the second ink tank, if the elapsed time is not less than the first threshold value and it is less than the second threshold value; and otherwise the ink is supplied from the first ink tank to the second ink tank, and the ink is jetted from the second ink tank to supply the ink again, if the elapsed time is not less than the second threshold value. It is these steps found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
